

# PAPER PLATE MASK-MAKING ACTIVITY

The Pre-Primary wing of Sahoday School had conducted Paper Plate mask Making activity for the KG Section on 7th July 21. It is one of the crafts that encourages the creativity of the children. The amazing and beautiful masks were prepared using paper plates, Fevicol, colours. Children enjoyed making different coloured masks of Whales, Rabbits, Elephants and Jelly Fish. This activity helped them enhance their motor skills by colouring and using their imagination to create different face masks. Students also showed keen interest in knowing about the animals they transformed into masks, which was a very exciting experience for them.
