

Leaf-Printing

Leaf Printing Activity was virtually conducted for the tiny tots of Nursery on 7 July 21. They were allowed to experiment with mixing colours and learnt the art of printing patterns of Butterflies, fishes, trees using leaves. Children dipped the leaf in the paint and placed the leaf on the paper and pressed firmly. This would get printed on the paper. During the activity, children observed different shapes, sizes and patterns of leaves. The little ones were delighted with their piece of art.
