

PASTA NECKLACE / BRACELET ACTIVITY

The Pre-Primary wing of Sahoday school had conducted the “Pasta Necklace activity” for the tiny tots of Nursery section on 21 July ‘21. Children enjoyed this activity by dipping the pasta in colour and then threading the string with these colourful pasta until the thread was full. They were excited with the end product of the necklaces and bracelets that they had made. This activity helped the Little Ones develop their motor skills and strengthen their fingers and eye coordination. It helped reinforce the Pre-Maths Concepts of Long and Short and proved to be learning with great fun.
